- Easily Adjustable Height
- User Friendly Control Box
- Thick and forgiving long life gripping belts
- Angle adjustment for tapered bottles
- Easy bottle size adjustment with hand wheel
- Height adjustable (Level or Angled)
- Accurate tracking

All Accutek Conveyors have variable speed drives and are available in a variety of lengths. Accutek Conveyors can be added to an existing line, and can be joined together length wise or at a 90 degree turn. Accutek's Bottomless Conveyor is used for moving containers to and from Turntables or other Conveyors.

The Bottomless Conveyor allows access for bottom batch coding and is compatible with all inkjet coding machines.

Each is made with heavy-duty stainless steel. Ask about our inexpensive and rapidly available custom conveyer designs to help you fulfil your special production needs.

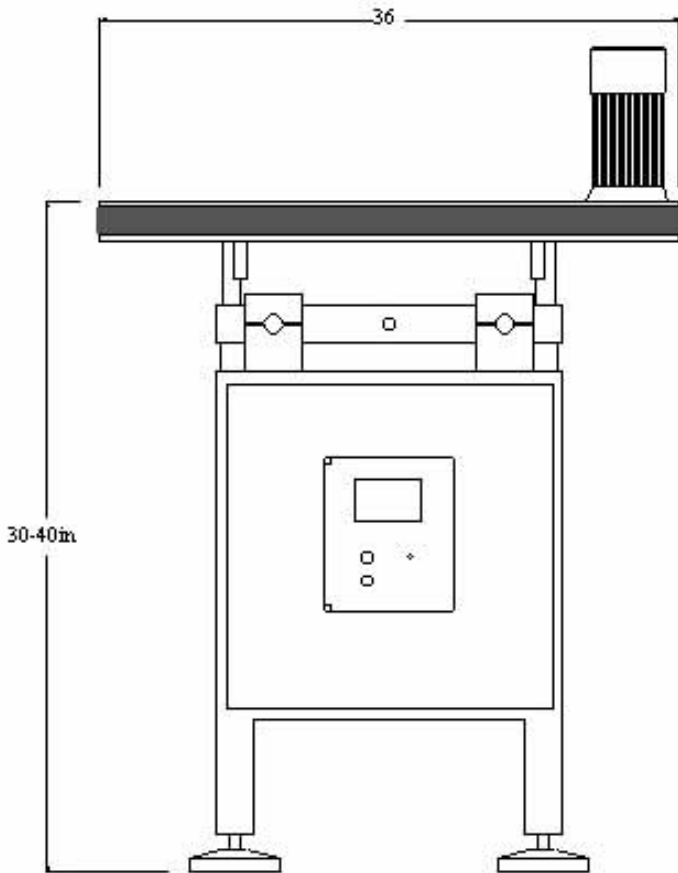

Our bottomless conveyor is ideal for lot coding the bottoms of bottles with ink-jet or laser coders. It works great for transfer purposes.

All of our equipment is manufactured on-site in Vista, California. Come and visit our showroom.
